

A Fully Hosted SaaS Solution

InfiniTime Online is a fully hosted SaaS workforce management solution. InfiniTime Online is one of the easiest to use workforce management systems available! Your organization can streamline its labor management via a securely hosted AWS© SaaS solution. Simply log into InfiniTime Online from anywhere in the world to view timecards, schedule employees, edit timecards, review job costing, manage leave requests, export to payroll, and much more.

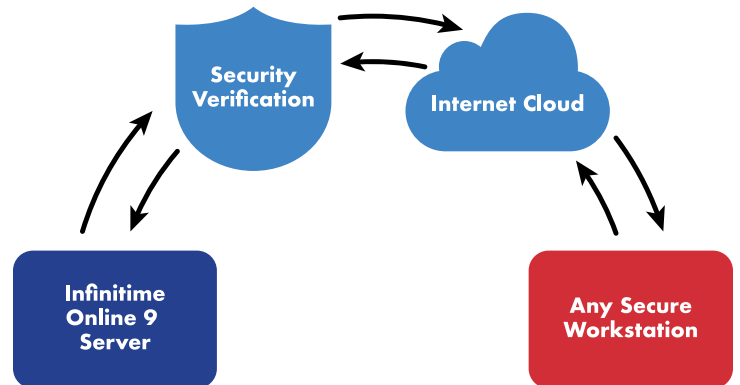

There is no software to install with InfiniTime Online. A web connected browser is all that is required to access all features. By using Amazon's servers, InfiniTime Online provides a robust secure application for you and your team.

InfiniTime Online is built on the latest internet technology. With this technology the response times and security are the top of the line. By utilizing our SaaS solution, you don't have to worry about data corruption, performance degradation, backing up data, maintaining hardware, or upgrading software. All of this is handled by our team of engineers. Our servers are constantly updated, backed up, and monitored to deliver a service you can truly rely on.

InfiniTime Online gives your team the option of adding mobile application capabilities, access control, biometric terminals, and badge reader terminals. You can monitor and configure the terminals directly from your InfiniTime Online management portal.

InfiniTime Online provides a robust toolset for companies large and small to manage their human capital. The latest data collection tools, calculation engine, reporting tools, and intuitive user interface makes it very easy to get information processed quickly and efficiently. Users find in depth scheduling and leave management that is fully integrated and works as one cohesive management system.

How it Works

Features
