

InfiniTime Atlas Mobile

Who We Are

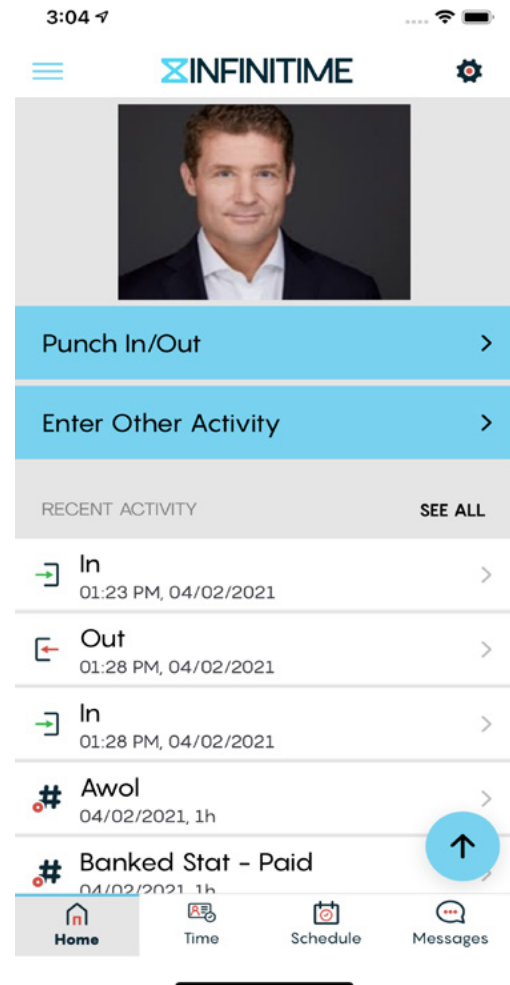

InfiniTime is a leader in workforce management. We provide innovative software solutions and services to aid companies in the collection and dissemination of information for the improvement of employee productivity. We help to maintain critical relationships through the integration, automation, and mobilization of time tracking related activities.

What We Do

The InfiniTime Atlas Mobile smartphone application is the latest in mobile application technology with an easy to use interface. It is highly configurable to the needs of today's businesses. The application is available in the Google Play Store and in the Apple App Store.

The InfiniTime Atlas Mobile smartphone app can be configured for geotagging punches, and geo-fencing specific locations. Geo-tagging allows each punch to be stored, showing the exact GPS location of the punch for your employee. The InfiniTime timecard map displays where the punch was made.

Geo-fencing allows you to limit your workforce to punch in within 300 yards of approved worksites. Geo-punching allows the application to automatically punch you workforce in and out based on their location. These features do not require employees be connected to a network or WIFI.

Features & Extras

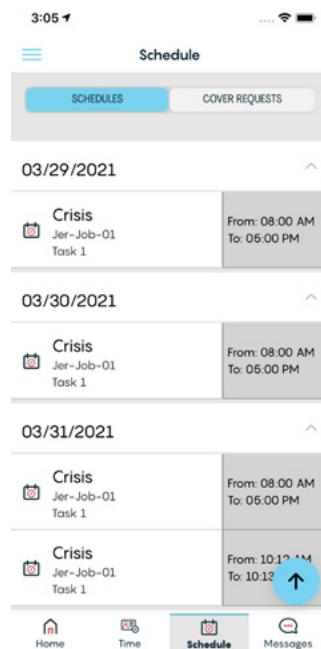

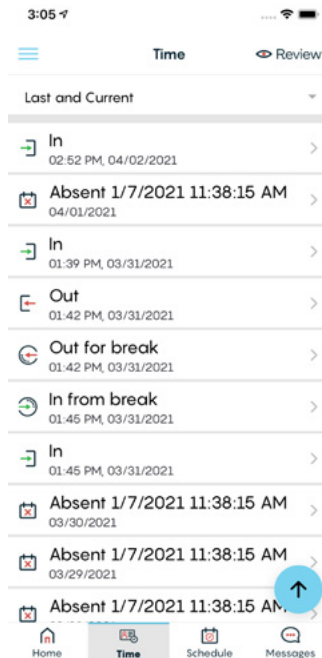

- Geo Tagging
- Unlimited Geo Fencing
- Electronic Timecard Signing
- Biometric finger scan
- Secure Internal Messaging System

Benefits

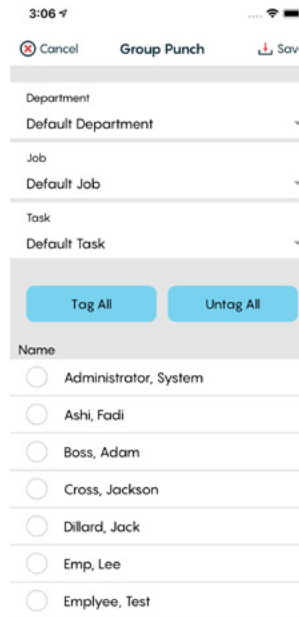

- Operates When No Data Service Available
- Provides accurate timekeeping records for compliance (DOL, ACA, FMLA)
- Employees Clock in Faster With 1 Touch
